POST-EVENT REPORT WITH SELF-REFLECTION

Semester: 4th - Spring

1. EVENT INFORMATION

Name of Event: First Aid Workshop

Organising Department: Department of Electronic and Software Engineering in collaboration with Rescue 1122 Abbottabad.

Date of Workshop: 15-04-2026

Venue: New Library UET Abbottabad Campus.

Resource Person(s): Training Team from Rescue 1122 Abbottabad –

Names: Naqash Ahmed & Sultana Riaz.

2. DESCRIPTION OF THE WORKSHOP

Introduction:

A First Aid Workshop was conducted at UET Abbottabad in collaboration with Rescue 1122 Abbottabad. The workshop aimed to provide students with essential knowledge and practical skills required to respond effectively during emergency situations.

Objectives of the Workshop

- To create awareness about first aid and emergency response.
- To train students in handling medical emergencies.
- To develop practical skills such as CPR and bleeding control.
- To promote community responsibility and safety awareness.

3. Workshop Proceedings

Activities Conducted during the Workshop

3.1. Conducted by Naqash Ahmed (Rescue 1122 Trainer)

- The session began with a **basic one-line definition of first aid**, explained as: “Immediate assistance provided to a person in an emergency to preserve life and prevent the condition from worsening until professional help arrives.”
- The trainer then moved towards **fire emergency management** and demonstrated the use of a fire extinguisher. He briefly explained the **color coding of fire extinguishers**, indicating different types used for specific fire situations (e.g., CO₂, dry powder and other categories) and emphasized selecting the correct type based on the nature of the fire.

FIGURE 1: Demonstration of Fire Extinguisher

- In the next part, he introduced **fire safety equipment (fire balls)**. He explained that:
 - Fire balls are placed in areas with high electrical risk, such as circuit panels.
 - They act as a preventive safety measure in case of sudden fire.
 - These devices automatically activate when exposed to high temperatures (commonly around **70°C**, as specified in standard fire safety products), releasing fire-extinguishing chemicals.

FIGURE 2: Explanation of Fire Ball

3.2. Conducted by Sultana Riaz + Naqash Ahmed (Rescue 1122 Trainers)

- **Snake Bite First Aid (Sultana Riaz):**
According to trainer, In case of a snake bite, the victim should be kept calm and the affected limb immobilized to slow the spread of venom. Tight items should be removed and the person must be taken immediately to a medical facility. Unsafe methods like cutting or sucking the wound should be avoided.
- Trainers then demonstrated **bandaging techniques for limb injuries**, particularly for an injured arm or elbow:
 - Use of supportive materials (such as rigid supports like cardboard) to stabilize the injured area
 - Proper wrapping using a bandage to secure and protect the injury

FIGURE 3: Demonstration of Arm/Elbow Bandaging Technique

- They also explained **safe lifting techniques for injured persons**:
 - Methods for lifting a person individually while minimizing further injury
 - Coordinated lifting techniques involving two people for better support and balance

FIGURE 4: Demonstration of Safe Lifting Techniques for Injured Person

- Furthermore, they demonstrated **basic first aid for head injuries especially forehead:**
 - Covering the injured area carefully
 - Applying a secure bandage to control bleeding and protect the head

FIGURE 5: Demonstration of Head Injury Bandaging Technique

- The session also included **choking response techniques:**
 - How to assist a person when an object is stuck in the throat
 - Use of back blows (controlled tapping on the back) to help clear airway obstruction

FIGURE 6: Demonstration of Choking Response (Back Blows Technique for Airway Clearance)

- Finally, he demonstrated **CPR (Cardiopulmonary Resuscitation)**:
 - Positioning the patient on a flat surface
 - Performing chest compressions to maintain blood circulation
 - Emphasizing its importance in life-threatening situations

FIGURE 7: Demonstration of CPR

4. Student Participation

Students actively participated in the workshop by engaging in practical demonstrations, asking questions, and volunteering during hands-on activities. The interactive nature of the session enhanced understanding and confidence.

5. Learning Outcomes

I learned regarding:

5.1. Community safety awareness:

Students gained awareness about safety measures and how to respond effectively during emergencies.

5.2. Importance of first aid in society:

The workshop highlighted how immediate first aid can save lives before professional medical help arrives.

5.3. Role of Responsible citizens during emergencies:

Participants learned the importance of staying calm, taking initiative, and helping others responsibly in critical situations.

6. SELF-REFLECTION

What I Learned from the Workshop

Key Skills Observed / Practiced

- ☒ CPR (Cardiopulmonary Resuscitation)
- ☒ Bleeding control / bandaging
- ☒ Burn treatment
- ☒ Fracture / sprain management
- ☒ Choking response
- ☒ Emergency assessment (ABC method)

7. Importance of First Aid (My Understanding)

First aid is a crucial life-saving skill that helps stabilize a patient before professional medical assistance arrives. It reduces the severity of injuries and increases survival chances.

8. Real-life application

This knowledge can be applied in:

- Home emergencies.
- Road accidents.
- University campus incidents.
- Workplace or construction site accidents.

9. My Personal Reflection

9.1.New Understanding of Civic Responsibility

I learned that being a responsible citizen involves helping others during emergencies and having the knowledge to act effectively.

9.2.Influence on Attitude Toward Helping Others

The workshop encouraged me to take initiative and assist people confidently in critical situations.

9.3.Confidence in Responding to Emergencies

Yes, I feel more confident now as I have learned practical skills like CPR and bleeding control.

9.4.Challenges Faced During Participation

Initially, understanding some techniques practically was challenging, but demonstrations helped overcome this difficulty.

9.5.Application in Real Life

I will use this knowledge to assist people in emergencies and promote safety awareness in my community.

10. Difficulties / Challenges Faced

- Lack of prior practical experience.
- Initial hesitation during hands-on participation.

11. Suggestions for Future Workshops

- Increase duration for more practical sessions.
- Provide individual hands-on practice opportunities.
- Include more real-life emergency simulations.

12. Conclusion

The First Aid Workshop was highly informative and beneficial. It enhanced my knowledge, practical skills, and confidence in handling emergency situations. The key takeaway is that timely and correct first aid can save lives, and every individual should be trained in these essential skills.
